Asgari & Associates is a boutique full service international law firm focusing on the intersection of business, law and public policy. Our firm is made of a small group of young lawyers dedicated to providing advice and expertise at the highest level.

We are known for our ability to assist clients with their international business and commercial needs, excellence of work in complex and challenging matters and combining affectively with clients, counsels and outside advisers.

I am the managing partner and founder of Asgari & Associates. I founded the firm in 2012. I graduated from University of London (UCL College) and specialized in International Commercial Law and Maritime Law.

It is a great advantage to be a managing partner of a law firm that is totally committed to providing the best client service and getting to work with colleagues that are innovative, dynamic and creative. In the fast changing economy and ever changing regulatory system I make sure that our firm as a leader in international law will remain ahead of the pack by providing the best services to our clients.

Companies entering Iran will always face repercussions from the regional sanctions, pervasive corruption in Iran and the non-stability of the regulations. Investors returning to Iran after a lengthy absence should make themselves aware of any legal and regulatory changes. While the geopolitics of the region will remain an immutable treat to the foreign investments, we will always find ways to make our clients business set ups and ventures less risky and more profitable.

For foreign investors considering entering the Iranian market we offer a comprehensive range of services from registering a company and branch in the mainland and free zones to joint venture and franchising. Once our clients face a dispute with a partner in Iran, our experienced lawyers are prepared to assist them with their dispute resolution matters.

We will always remain at our client's service once they have established their businesses in Iran. Our services after registration of their entity includes tax consultancy services, accounting services, labor law, logistic affairs, freight forwarding, and custom and shipping services.

We view each client and the issues they ask to resolve differently. We tailor our analysis but more importantly, our recommendation to the needs of our client's assignment. We are very proud of the results our clients have achieved in response to the assistance we have provided.

We see the market cycles as an opportunity to look within and find ways to be more innovative and connect with our clients.

Iran has many investment opportunities. An educated and young workforce, economic natural resources of petroleum, natural gas, coal, chromium, copper and iron, appropriate transport, infrastructure and access to international waters, a strategic position, land borders with seven countries and proximity to other countries in Middle East and Central Asia and major tourist attractions.

Yet there are some concerns among the investors that might affect their decisions. Similar to other developing markets, economic stability concerns are the main potential risks on the list of investors.
